Griffith went to Bermuda in the West Indies to get atmosphere for a "South Sea" Island spectacle. But it remained for a semi-sciencial film party from California to set sail for the wilds of cannibal-land in Polynesia and to "shoot" the real man-eafers. When William F. Alder, member of the Southern California Academy of Sciences, and Edward Laemmle returned to Francisco a few days ago they brought with them valuable records for anthropologists and incidentally much material that will be worked over to give realism to forthcoming motion picture releases of the Uniyersal Film Company.

PENETRATED JUNGLE

The explorers obtained their headhunter pictures in the jungle of Friedrich Heinrich island and the outhern coast of New Guinea, between the South Sea Islands and Australia. To be shipwrecked among the cannibals was also an experlence of two intrepid Americans, who in search of adventure, risked their necks and after many harrowing experiences covering a period of fourteen months, returned to the United Stataes with the proofs of their explorations in the form of They found that although the can-

nibal inhabitants are the most uncivilized on earth, they are progressive in many ways. The natives, who are known as Kia Kias, are real head hunters and have neighbors with the same tendencies. They never can tell when they may be pounced upon, unexpectedly, and decapitated. They have learned, however, how to provide themselves into the hair, in the manner shown in the Kia Kia belle picture, and is allowed to hang almost to waists. It is not easy for the sharpest weapon to penetrate this style to schedule.

A KIA KIR BELLE

The women of cannibal land do not have long hair, but plait strands of raffia and rattan into it, letting the strips fall loosely to their waists, as shown above. The warriors are proud of the holes in their nostrils, through which they force ornamental rings and bars. do but make the best of it, we wer back to our camp and, though both of us were utterly exhausted, we felt that it would be certain death for us if we should both go to sleep. Our Malay boy proved a wonderful help and friend to us through that terrible ordeal. The next day he came to us saying that he heard rumors that a head dance was to take place. Up to this time no outward demonstrations had been made against us, but the savages, on hearing that we wished to be present a the head dance, warned us to star

away. But we had come half way around the world to photograph just these things and we meant to do 50: Taking our cameras and silently concealing them in the underbrush, camouflaging our position with palm leaves, we started to photograph the dance, getting close ups with our tel-photo lenses. The women are the chief feature of the head dance With heads decorated with tufts of birds of paradise and cassowar feathers, the women danced in the center while the men wildly circled

about them. DANCE GROWS WILD

The dance grew wilder and wilder, and soon the spectators began to join in the chant. Some of them joined in the dance with the war-riors. We managed to get several hundred feet of this and were hap-pily grinding away when unfortunately a Kia Kia on his way to the dance soled us from behind: gave one wild yell and rushed into the dancers, warning them of our presence. We hastily grabbed our camera and made for our camp with the whole tribe madly chasing We fired several shots at them and for the time they hesitated in

On reaching camp you can lim agine our joy to find the camp sur-rounded by Ambonese soldiers. Not having heard from us at the port from which we started they missed us, and a detachment of native soldiers was sent to our rescue. They came just in time. There is nothing that the Kia Kia fears more than the Malay soldier. 660 Vernon St., Oakland. Once upon a time there were two little girls named Mary and Bell. Mary was a gentle, quiet little thing, but Bell was a great tomboy and leved animals and birds. One day the two girls went into the woods and were playing when Mary heard a "Peep! Pee;" Looking around she saw a spake trying to eat a baby

bird.
"Oh!" she screamed. "Look, Bell!" Bell looked, and at once told Mary to keep still, while she killed the

snake.
"Oh! don't kill the poor snake!" hrieked Mary.
"Of course I will! You don't want the baby bird killed, do you?"
"No, but the shake won't reall, all it. I'm sure.'

So the two girls argued and arrned. But when they looked again the baby bird had disappeared and the snake was gliding away with a BULGE IN THE MIDDLE! You see, n isn't good to argue too much!

'Mary Pickford Is Greatest Woman in World,' Asserts Editor Horatio Bottomley

"Should not America take her motion picture stars more seriously?" The viewpoint of the average American film fan is that the persons on the screen are merely mountebanks, performing for their amusment. While aridanting is not the appropriate of the European minds. The neaples

of England, France, Holland, Italy and other countries visited by Mr. and Mrs. Douglas Fairbanks do not treat them as merely performers. The crowds waiting around the Ritz Hotel, London, and Paris, did not wait, according to European papers, out of curiosity, to see the two leadand paying tribute.

The staid, conservative and dignified London Times, in its reserve and deliberate editorials, hails Miss Pickford as "truly an ambassadress of our

race." Horatio Boitomley, the fiery editor of John Bull, the rabid proEnglish publication, goes to some lengths in the London Sketch in analyzing the feeling of Europe towards Our Mary and Doug, excerpts of which article appear below.

I have often wondered to myself who are the "great" people of the world No doubt we politicians and journalists would be disposed to answer the question in our own favor, but do we really very much matter. Isn't the inventor of the telephone or of wireless telegraphy an infinitely more important person? And what about the discoverer of the X-rays—so wonderful that we can't yet find a name for them And the astronomers, who can tell us to a few yards the exact distance we are from the sun, and when and where some orb in the beavens will take it into

find a name for them. And the astronomers, who can tell us to a few yards the exact distance we are from the sun, and when and where some orb in the heavens will take it into its head to perform some particular antic a million of miles away? Surely these men are greater than those of us who merely talk and write about what other people do—or ought to do.

WHAT IS GREATNESS

But, great as they are, there are greater still. I am using the term "greatness" as connoting the biggest hold upon the mind and soul of the people. They, after all, are the final judges. You may be very learned in the classics, you may speak and write Greek and Latin as gibly as you do your mother tongue, every problem of the higher mathematics may be child's play to you—but, with it all, you may be a very small person, and even a fool—that is, in the opinion of your fellow men, who, I again say, are the judges.

I remember, in the early days of my parliamentary candidature, once taking down a distinguished scholar—a Senior Wrangler—to address one of my meetings He made what Mr. Asquith, or Mr. Balfour, would ascribe as a masterly speech—but during its delivery my agent, who was street who are the masters and judges of us all, passed me a note or or complete the safety will be a say in the classic will be a say about the wonderful demonstrations of last week in honor of Mary Flekford. Was anything like it ever seen before? I am going to say I don't know Mary—la mashaned to have to confess that I have never seen her even on the film. But I realize today that she is the greatest woman in the world. No empress, no queen, ever evoked such demonstrations and enthusiasm and love She must be a wonderful in my be altogether wrong in my attempt to diagnose the secret of her popularity. But here goes—I'll have a try.

For nearly six years we have been the creatures of pent-up emotions; and Mary has come over to release the safety valves. She is the Ambassadress of Sunshine to a war-worl, weary world And we sorely meeded her But having come, we must n street who are the masters and judges of us all, passed me a note sking, "Wherever did you discover this guy?" That was one of my first shocks about the "great men" of the drab monotony of that dismal assembly.

ANOTHER AWAKENING

Some years later I had another As an ardent student of nolitics in my younger days, I had been present at and taken part in most of the great "demonstrations" of the 'elghties, when Gladstone and Bright and Diraeli and Joseph Chamberlain were the "great" protagonists of one cause and another—and I had come to believe that they were the only men who mattered. As time went, my cyes were opened, but still I thought that only the "leaders" of the people counted. And then I had a remarkable awakening.

GODDESS OF CHILDREN

What a house you would have on the occasion of your maiden speech. You would plead for the brightening of the lives of the people to whom you are a perennial source of joy. There would be no cant, no hypocrisy about you—what you lacked in knowledge of politics you would make up in an intimate touch with the humanities. And they, after all, are the things which count. I beg you to consider very seriously my suggestion.

Gertrude Atherton, one of the Gold-Gertrude Atherton, one of the Goldwyn Eminent Authors, has arrived at the Culver City studios from the East and at once got busy studying screen technique. While she has already contributed to Goldwyn's screen iterature, she has not hitherto written directly for the screen. Now, however, she is engaged upon writing a scenario and will remain here several weeks until it is finished.

Delightful Adventures of City Man Who Seeks to Improve Country Life Are Set Forth in Humorous Manner.

It is difficult to determine which is the more appealing in "Young Hearts," the humorous and human incident or the simple manner of the telling. J. E. Buckrose, and it is Mrs. Buckrose who hides behind the initials which would seem to denote the man; has a gentle way of touching on foibles that makes her readers think all the more of the characters' concerned.

In this volume she has taken a leader of small town activities, a somewhat pompous man, who loves the sound of his own voice and who swells with importance at every opportunity to decorate a public platform and moved him to the quiet country-side. He is a man obsessed with the idea of improving his fellow-men, a lovable and somewhat laughable character who becomes at once pathetic and heroic,

THE COMMON HOPE

I don't know how to say it, but somehow it seems to me That with all our different habits, we are just one family. Underneath the robes of fashion or the overalls of toil The seeds of good are sproutin' in the self-same kind of soil, An' the weeds are there a-plenty, but the last, conclusive test Will show that everybody here has tried to do his best.

In the things that count, we're brothers, though we differ as we will, An some have more of money, an' some have greater skill, An some know more than others, an some face more of strife, We're all of us endeavorin' to make the most of life. Au' there's no man but is plannin' every minute of the day For his children an' their future an' their right to romp in play.

The humblest man among us takes his youngster on his knee An' dreams his splendid vision of the man he's going to be: The joys he wants to give him are the very self-same joys Which you hold to be the birthright of your little girls an boys, An' as you would slave to serve them through the years which are to be An' guarantee their comfort to the end, so, too, would be.

He shares the self-same sorrow when his loved ones suffer pain. Rejoices just as you do when they come to health again. Is hurt by disappointment and is cheered by happiness An is striving just as you strive for the things men call success. Oh, I don't know how to say it, but howe'er a man be dressed to be because to the Calture, he has tried to do his best.

Wild Calls Wolf Dog; Hides Litter In Berkeley Hills

If snows fell on the heath at the head of the gully that opens into Channing way, and silent, relentess winter made waste of the Bereley hills, perhaps the frosted air of next winter might carry the pack all of wolves running the game

They would be unlucky, these olves, should they lift their muz zles to the frosted moon and sound the rally cry of the pack.
Out under the brush there is a

little cave, its opening covered by a screen of brush, its interior warmed in day by the sun, by night with the heat of mother earth. In this cave there are five angular. playful and sharp toothed puppies Every hour or so a big, powerfully-built, Russian wolf hound dashes from the cave and goes off over the hill. A half hour later she returns, dragging her kill. Sometimes it is a rabbit Sometimes it is something brought from the home she deserted to give her puppies a life of solitude

If one becomes too curious about what is in the cave, the big terror of the timber wolves that roam the steppes, growls and bares her fangs. A good deal of cajoling permits one to come close enough to look, but not to pet her brood.

If they stay out in the hills it would not be healthy for the pack to run near the head of Channing

It is the first case of its kind in the history of the state courts. Mrs. Wright sets forth tht she was employed as a bookkeeper for the defendant comporation until August 30, 1919. She says that she was dismissed because she had lost the use of her right

She says tht while she was employed by the company she was constantly urged to work faster and faster under threats of losing her position and this caused her to overwork.

JURY OF WOMEN GETS VERDICT IN **FIVE MINUTES**

INDIANAPOLIS, Ind., Aug. 28. -(United Press.)—Indiana's first woman jury today reached and returned a verdict in five min-Only one error was recorded.

The forewoman signed the verdict as "foreman" and was gently cor-rected by Justice T. E. Malcolm. The court then thanked his jurors' and presented each with a write carnation as she left the room. Court attaches were all dressed up for the occasion and vases of flowers hid the dusty heaps law books

The case involved the possession of a phonograph, the jury deciding it should be given to Mrs. Lithe Robertson by Sachs prothers, pawnbrokers.

FOR NATION PACT ISHARDING PLAN

MARION. Ohio, Aug. 28.-To the choing cheecs of a vast throng of ndiana and Minnesota Republicans, Senator, Warren G. Harding today dismissed the League of Nations as a hopeless wreck, and proposed to rect in its stead an improved Hague good can be called from the exist

ing league covenant.
His denimications of Democratic wiggling and wobbling brought shouts of amoroval and the yard in front of Harding's house rehounded with repeated cheering when he declared the present league dead be-youd hope of restoration.

PARTY LEADERS ENTHUSE, Party leaders assembled for the occasion were "enthusiastic, declar-ing Harding has, swung into an ofensive on the Lague issue.
"His voice new leads the statesmanship of America," Will H. Hays, national chairman, decaired tonight, ifter hearing the address. Harry M. Daugherty, member of the campaign communities, declared Harding has "offered a practical working program to preserve peace

for the strange hybrid of autocracy and idealism that is the Wilson eague of nations." HARDING'S PROMOSAL Harding traversed almiost the en-tire ground in his discussion of merican foreign policy. Much significance was attached to

Harding's declaration that:
"What is in my mind is the wisdom of calling into real conference the ablest and most experienced minds of this country, from Whatever walks of life they may be derived, and without regard to party affiliation, to formulate a definite, practical plan along the lines al-BERKELEY, August 28.—H. Russ Crown Jewels

Safely Hidden Away PARIS, Aug. 28.—The crown jewels of Russia, including the great stone known as the "Diamond of the Czar" and valued at \$2,000,000, are hidden away either in Russia or in some of the bordering states and may not come to light for years, ac-

cording to Paris jewelers.

There was no interest shown here among gem purchasers when it was reported that some of the crown jewels had been secretly brought to London and were to be sold. Since the revolution several of the biggest jewelry houses in Paris have spent large sums of money running down similar tales in the hope of making big profits. Superior Judge E. C. Robinson that an executor of an estate who is an attorney has no right to employ another attorney to handle the legal affairs of the estate, Judge R. B. Tappan has announced the he will appeal to the supreme court.
Judge Tappan is executor of the \$50,000 estate of Margaret Graham, in connection with which there was a contest. The chief beneficiary under the will was Mrs. Anna Fortmann. The evidence showed that Tappan advised Mrs. Fortmann to hire a private attorney to defend her ured Judge L. R. Weinmann.

Judge Tappan employed Attorney F. A. Berlin to look after the other legal matters connected with the esate and he submitted a bill for \$730. which Judge Roomson disaboved. LORD MAYOR SCARCITY DUE TO POOR PAY

LONDON, Aug. 28.-Added to her other troubles England is at large cities and Mayors for the smaller municipalities. The reason for the shortage is that in the anajority of the English

cities and fowns the Mayoralty is an unpaid position. The average business man gives as his reason for declining the Mayoralty that he cannot afford the time in these days of the H. C. L. to fill the Mayoval chair without sufficient compensation, Consequently, England will have to increase the number of taid Mayors in the very near future or go without them. The cities that can boast of paid municipal chiefs are Shellield, Manchester, Cardiff, Bristol, Don coster and Eurosiev, and all of these Mayors are kicking for more money. Shelfeld makes an allowance of \$5,000 a year to its Lord Mayor, and Manchester \$10.soo and the use of an automobile to its municipal chief. A Lower-Price Silk Sale

Special Purchases of

Fresh Shimmering Silks sell at the lowest prices

Feeling that a break in the silk market was going to come, we refused several months ago to place orders and load our stocks at the higher prices. As a consequence our buyer on his recent purchasing trip to New York, was able to take every advantage of the market decline in silks. As a result we made some very wonderful special purchases for Fall which we are going to give you the immediate benefit of, so that the savings may be helpful in your Fall dressmaking.

New, fresh patterns, colorings and designs at savings that range, in many instances, was one-half the price at which similar silks have been selling for many months.

June and July automobile and motor truck registrations in Cali-fornia reached new high marks in the number of motor cars and commercial vehicles sold in this state. According to the summarized figures which are published each month by the Automotive News the sale of cars and trucks in June was considerably in excess of 11.000, while in July the total was well over 10,006

If the latter figure were main-

tained for the twelve months of 1920 the motor vehicle business would attain a grand total for the present year which will equal the showing of any other state in the

Indications are that business will hold up particularly among the distributors for the standard makes of vehicles. For the first time in nearly two years most of and thye are now really making an effort with larger forces to get new sales If the prompt delivery condition can be maintained con-

This frequently results in their leaving unremedied the condition that caused the puntture. Thus a bit of metal or stone or other foreign substance is left in the tire or a broken place in the fabric is left un-mended. And the tire goes flat a short while after it leaves the shop.

Tire experts always find out the cause of damage to the tube they are repairing and they set about eliminating the trouble. They have a machine that enables them to give the in-terior of the tire a thorough going over. They spot foreign substances and broken places in the fabric and clean them out. They take "a stitch in time."

or an overhead bridge over the main line and electric railroad tracks at the foot of Seventh street in Oakland, there will be little chance to use the shorter ferry route from Oakland pier to San Francisco.

This crossing is protected by gates, but there are so many trains passing there every minute of the day that long lines of motor cars would be waiting to cross both ways if the ferry was used for motor

In order to show the condition of the crossing, C. L. Hulin, manager of O. N. Hirsch Company, sent a Lexington car there the other day

and had some pictures taken.

The city and the Southern Pacific are co-operating in building a con-crete road from the end of Seventh street along the pier to the mole. This is for motor traffic, but the Southern Pacific will not consider the use of the pier for the main ferry service for automobiles until some provision is made for running automobiles under the tracks or over the tracks

The talk of using Alameda Pler, with a road through the Encinal City and across Bay Farm Island and into East Oakland is entirely feasible, yet Southern Pacific offi-cials are not convincible of its ne-

cessity.

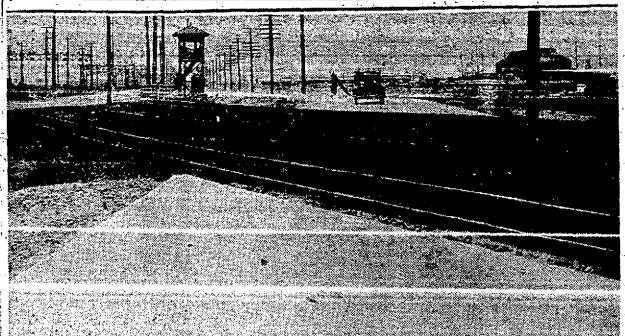

There is an interesting problem there and one that must be solved in the near future.

What is claimed to be one of the most surprising examples of con-tinuous tire inflation under adverse conditions was brought to light recentry when employees of the Miami Conservancy, Hamilton, Ohio, hauled in on the end of their dredge bucket an old Reo touring car from the Miami river.

four tires were still intact and ac-cording to the operator of the dredge three of them were still inflated after spending seven years submerged in the river. All four tires were 35x4 Goodrich fabric tires, bearing manufacturer's date of June 12, 1912.

Government Tests

The Government Postal Department has now undisputably demonstrated that Essex motor cars can be depended upon for sustained speed over a long road course in spite of storms, mountain grades or desert sands. They have shown that Essex is staunch, true and dependable in

summer heat or winter cold. They have proved the fact most prized by all motorists, that Essex is mechanically right; that it has "staying" qualities which make it capable of going the route from start to finish.

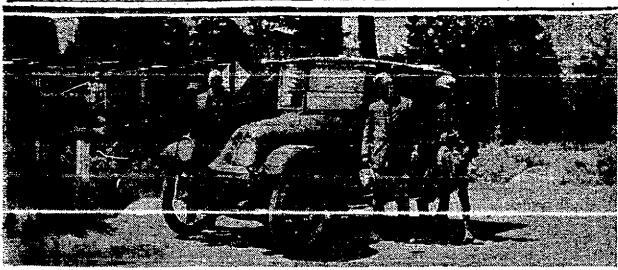

Owners, Too

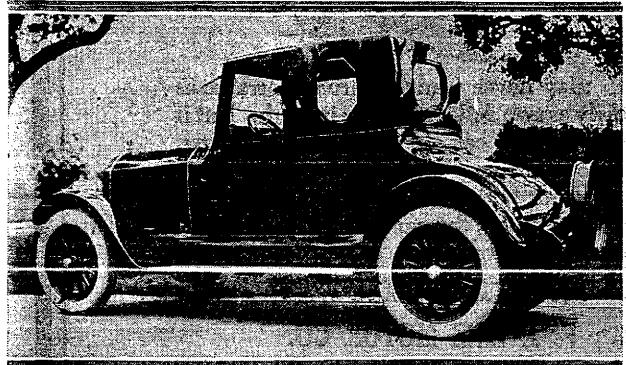

This confirms the results obtained by the 40,000 owners of Essex cars, from Canada to Mexico-from Maine to California, who have learned that they, too, can depend on Essex construction to carry them safely, surely and economically throughout every day of the year.

Thanks to our recently expanded territory (we now have all of California, Nevada, Arizona and Northern Mexico) we are in a position to command increased shipments, which will relieve the recent shortage so that everyone who wants an Essex can get one at an early date.

CONSIDERED BY MANY MOTORISTS THE BEST FABRIC TIRE ON THE AMERICAN MARKET

A PRODUCT OF THE HOUSE OF SPRECKELS

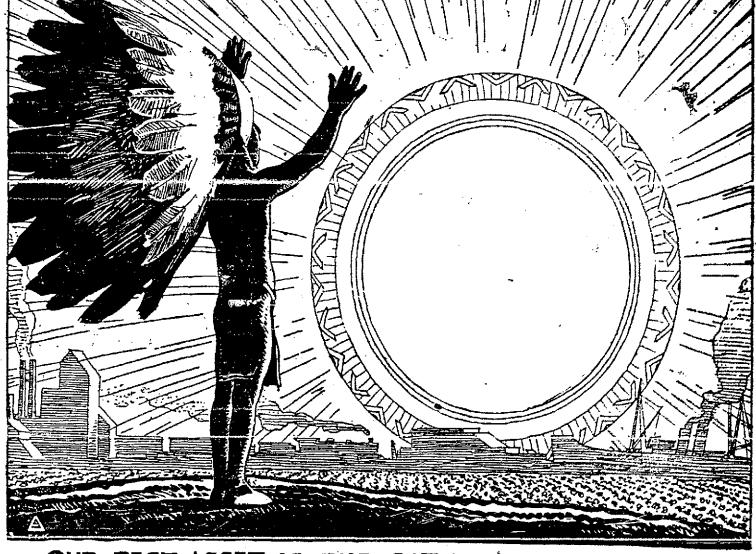

The mighty House of Spreckels, famous in all the world, and with resources as limitless as the waters of the Great Salt Sea, is behind The Spreckels "Savage" Tire Company in its purpose of manufacturing for you, O Motorists, dependable goods of merit. Great is the name of Spreckels, and only those goods that are worthy of bearing that name are allowed to leave our doors. Our task is a pleasant one, for we are building up to a standard of perfection, not down to a price.

In our "D" Type tire we have found expression for the high ideals of a great HOUSE; we have given you the best that is in us. We have Built to Excel.

In the great effort to make our "D" Type worthy of the name we bear, and to fully

reflect the purpose behind the making of it, we have put into it all the wisdom given us by the Great Spirit, and all of our many years of experience. Our method is the best we know; our search for flaws is never-ending; our raw materials the finest in all the world.

On the rocky trails of the mountains; on the smooth pavements of the cities; on the heated roads of the sandy desert; over the mud and stones of the land of forests; over the broad highways of the plains; has our "D" Type been tried and not found wanting. And the word has gone forth in all the land that it is "the best fabric tire on the American market". I SALUTE YOU, O MOTORISTS

HOW TO REPLACE WHEEL WITH CAP CONE BEARING

When a wheel fitted with a cap

and cone bearing is removed, the rup of the bearing is removed with it and the bearing must be adjusted in replacing the wheel, The proper way to do this is to turn the bearing up tight and then move the wheel a few times by hand. This does away with any tendency to blacklash. Next the edjusting nut is backed off very elightly, so that by grapsing two spokes in line, one above and the other below the hub, a slight shake is felt in the wheel. This move-ment should be just barely per-ceptible, and if it is more than this it is too much and the adjusting nut should be a little tighter. When this condition has been attained lock the wheel in

Brake Inspection

The usual method of inspecting the brake system is altogether too perfunctory for this essential part. As a matter of fact, all parts of the brake system ought to be tested every two weeks. The pins and clevises should be examined, and it should be ascertained that none of the bearings has frozen because of rusting. Used Car Special Display Ends This Week

IF you are in the market for an automobile that. has seen service be sure to inspect our stock this week. The exhibit is varied and attractive. Most of the cars have been through our repair and paint departments. Many have costly items of additional equipment. The price set on each car is reasonable, indeed. The list includes the following:

HUDSON PHAETON

A 1916 model of the popular super-six T-passenger; plate glass in sides and back of top; good tires.

CHALMERS TOURING

A 5-passenger 1919 model, with five good tires; well-worth a prospective buyer's consideration.

CHANDLER TOURING Cord tires so with the 1918 model of this well known make: it has spare tire, two bumpers and motometer.

DODGE BROTHERS SEDAN The mileage of this 1920 model of dependable make and deserved popularity is less than 3000; extras

ESSEX TOURING

This 1919 model of the "little wonder car" has been revarnished and the tires are little worn.

HEALTH?

A story of one remedy after another, without results. Doctors, baths, massage, all without number, and still sick.

STOD DROSDECTING

There is only one rational way to get health—REMOVE THE CAUSE OF DISEASE. Without a cause there can be no disease. Remove the cause and NATURE cures. CHIROPRACTIC SPINAL ADJUSTMENTS remove the cause of disease in the body.

WHAT IT MEANS TO YOU

THE THATCHER SERVICE OF FALMER CHIROPRACTIC is different—it means that instead of simply a "punch in the back" your case receives careful, scientific study. I am a THREE YEAR GRADUATE CHIROPRACTOR, from the greatest college of its kind in existence, THE PALMER SCHOOL OF CHIROPRACTIC.

PHYSICIANS PHYSICIANS STOMACH TROUBLE CURED

My stomach was my master for many years. I am & clerk in the office of the lumber department of the S. P. Co., and after every meal I had an annoying grating sensation, together with an empty feeling in my stomach. Through lack of nourishment my health was broken and I was in a hospital for several weeks. The doctors first cleaned me with a stomach pump. Then they treated me for vicers, and finally, as I did not improve, they observed my digestion through an X-ray. Concluding that they could do nothing for me they sent me home with the suggestion of an apparatus gestion of an operation,
Then a follow complete who had received a great benefit

by drinking the FONG WAN CHINESE HERBS suggested Wm. A. De Mooy that I try them. The first cup of tea brought me genuine relief, and after a few weeks I was entirely cured. I am back in the office, and will be glad to give my personal testimony to any desiring it. WM. A. DE MOOY.

Why Do You Use the Term "Straight Chiropractic"
To be frank. "Straight Chiropractic" is superfluous. There is only one kind of Chiropractic. The

name "Chiropractic" is derived from two Greek words, "done by hand," That is all Chiropractic was or ever will be-the use of the bare hands to adjust the misplaced Vertebrae

Every successful discovery begets imitation There are several reasons why you should get "Straight Chiropractic" First, incompetence due to improper training or lack of training. Second, the selfish policy, "anything to get the money." Their motto is, "Give them what they want instead of what they need-

it's the easiest way." The ability to get the people well in the shortest time, with the least inconvenience, for the least money, places "Straight Chiropractic" at the head of the healing profession.

Consult Dr. Stiles and get "Straight Chiropractic."

Dr. Stiles has a free clinic for those unable to pay, others at a moderate price. You are invited to attend these clinics, Mon., Wed.,

CLIDODDACTIC In the science of Chiropractic the Brain, Spine and Nerves are looked to for the health of the whole body. The brain intelligence being transmitted to the body through the nerves, by way of the spine. At the spine is the only logical place that hindrance of this brain force can take place. When such a condition exists ill beauty follows. This fact is known to the Chiropragary who adjusts. known to the Unitopractor, who adjusts that segment (vertebrae) of the spine thus relieving the compression and health results by the forces that reside within the body.

Certification of the sufficiency of TREASURER'S SHORTAGE while the neglect of the children, the initiative petition circulated by Those "Shoe Men" made the most who play all day in the dirt, develops Oakland firemen calling for a vote the discovery of an apparent ascaris, or round worm. The death on an ordinance readjusting the department salaries on the basis of a each fireman, was prepared this morning by City Clerk Lon W. Cummings for presentation to the

ity council Monday morning. Cummings' certification declared that the petition contains the names of 6941 qualified electors of the city and in all ways conforms to the reouirements of the city charter. The success of the pelition, which circulated after the council cut the firemen's requested mentaly increase from \$25 to \$10, determines that the ordinance must be submitted to the people at a special election to be set Monday by the council.

They go to a store where they see watches for sale and where the elert knowne little more about watches than they do themselves and select the smallest one to be found with plenty of frills and with the cheapest kind of works inside. Asking if it is guaranteed, they are told, "oh, yes, ten or twenty years." Within the next few days when the watch stops, and they take the watch back to the store, they are told upon asking about the guarantee that the guarantee is on the case told upon asking about the guarantee that the guarantee is on the case only and not on the movement. Not meeting with any satisfaction, they then look for a RALLROAD WATCH INSPECTOR and take it to be repaired. They are then informed that the watch cannot be repaired as it was originally not made to keep time. They then realize that it is better to buy a watch from a thoroughly reliable WATCH HOUSE that specializes on watches.

HE MADE WIFE. WORK; SHE GETS HER A DIVORCE

Elmer H. Page, haberdasher at 1143 Seventh street, compelled his wife to wear overalls and run a push cart loaded with stock down to his branch store near the Moore shippards, according to one of the charges made by Mrs. Susie A. Page, 539 Adeline street, which won her an interlocutory decree of granted yesterday by Judge A. F. St. Sure. A property settlement was made out of court,

Mrs. Page said she not only ran the push cart but her husband compelled her to do janitor work around the store besides attending to her household duties. He also constantly nagged at her and frequently slapped her face until this treatment, coupled with hard work forced her to take a rest in the country on the advice of a physician. When she started on the trip Page told her she need not come back, Mrs. Page said,

and although she was adverse to applying for a divorce concluded that was the best thing to do.

Ye Olden Days

One of our Oakland pioneers. William ("Billy") Blote, tells some incidents of early days, as follows:

"In early days, including the arly 60s, the Agricultural Pavilion stood in the center of the block now occupied by the Court House. It was the only place in town large enough for a show or dance; so, whenever there was anything doing, the whole town was there. You could see them coming, some with the old-time four-cornered tin lanterns burning enndles inside. As for streets was go-as-you-please; the thing was to get there. There was one show which came often; this was the Glass Blowers. They could blow anything from dippers to animals and ships, and were the scurce of great wonder and admiration by us boys.

In front of the Pavilien was

Once, when the halyards broke, the town officials offered \$5 to anyone who would put in a new A sailor boy came along. tried, got half way up and came down, saying it was too much of a job for the money. One of the town boys came along and, inquiring 'What's up?' learned of the sailor's failure and asked who offered the money. 'Capt Brown.'

"'Now, you just watch me get that money,' said he; and pulling off his hat, coat and shoes, hung the rope around his waist and. with the pole rocking and sway-ing, put the rope in place and came down. Will Rogel was his name; and the boys hunted up Capt. Brown, and saw the \$5 in the hands of Will. His sudden financial prosperity started him to 'buy out the town' for the bunch There being no ice cream parlors or candy stores, the 'bust' limited to blowing in most of the 'fiver' on such juvenile luxuries as peanut sticks, jujube paste, lozenges and bottle soda."

Cans Round? They're Sardines, Anyway

EOSTON, Aug. 28. — Representa-tives of local fisheries companies who have returned from the Maine sar-dine canneries districts state that, owing to the tin can shortage, an innovation is coming in sardine cans. This year for the first time, they say. Maine canneries of the tasty little fishes are to use other than the faniliar small oblong cans for sardines. They will use both the round salmon cans and the larg oblong cans in which kippered herring have hereto-

fore been nut up.

The 1920 sardine yield, they announce, will be a large one, but much of it is likely to go to waste unless more cans are forthcoming.

J. A. ELSTON, who has represented Alameda County in Congress for three terms, is again a candidate for the Republican nomination and should be returned. To send an untried man to, the House of Representatives in this critical year may be disastrous to the County and the Country. The Country at large and Alameda County need the services of a man of experience. Problems of world-wide importance confront the next session of Congress and problems of the utmost importance to Alameda County are pending. The people of Alameda County need J. A. Elston because of his knowledge of these affairs. A new and untried man may mean disaster to many important plans.

The claims of Alameda County to the Naval Base are not yetsettled. Congressman Elston has this matter in charge and a change in the Alameda County representative in Congress at this time will jeopardize the location of the Naval Base on this side of J. A. Curious Facts About Weight; the Newest Way to Reduce

By Dr. LEONARD K. HIRSHBERG. A. B., M. A., M. D. (Johns Hopkins University.)

Weight is not such a strange Professor Eolvos of Budapest describes in La Nature, Paris, some facts about weight.

When you are walking due east you weigh less than when standing still, and when walking due west you weigh more than when standing still. The difference 's only a few hundredths of an ounce, so you would need very delicate scales to measure it. 'A loaded railway car weighth. 100 tons when standing · about forty pounds when eastward at twenty-five hour, and gains about forty

spead. is no paradox and it is fairly easy to explain. When standing still on the earth your body is the object of two forces, the first of which, your own weight, is directed vertiealth and touck to keep you pressed to the ground; the second is the centrifugal force caused by the rotation of the earth on its axis once in twenty-four hours. This is directed at a tangent to the circumference of

when moving westward at

the earth. The earth turns from west to east, so if your weight suddenly became nothing, thus leaving no force holding you to the ground, you would fly off the earth in an eastward direction and go on at a speed of about a thousand miles an hour until you were lost in space or came into collision with the moon or another planet or some star, or until you recovered your weight and were drawn by gravitation back to earth. on which you would land.

These two forces, gravity and centrifugal, are blended in acting on your body, whether you stand still or move. The result is the weight you feel which impresses itself upon a weighing machine. If you move in the direction of the earth's rotation from west to east, the centrifugal force increases and the weight, of your body diminishes; if you move contrariwise to the earth's ro-"No region in all North America tation, from east to west, the centriis more frequently mentioned or fugal force decreases and the weight

It is easily the greatest opportunity ever presented to the homeseeker in Oakland, and the Dahlia Society, is an ardent dahlia producer and will exhibit a number of fine new types of flowers. one that will never come again.

We invite comparison. There is absolutely nothing in the lake district that compares with it. Come out today and be convinced.

This photograph shows you better than any words of ours can tell it the wonderful view from Lakemont. It is unequaled.

On sale at the lowest price for this class of property ever offered in Oakland and Piedmont.

COST TO YOU—

You pay 10 per cent down and balance at one per cent a month. No interest until July 1, 1921. Ten per cent off for cash.

LOCATION—

The location of Lakemont is ideal. It lies between Excelsior and Cleveland avenues and is one block east of Lakeshore avenue. It is elevated and yet sheltered. Because of its location it has for years been the show-place of Oakland.

TRANSPOR-TATION—

Lakemont is within one block of Lakeshore avenue and two blocks from the Lakeshore Key Route, giving direct transportation to San Francisco.

IMPROVE-MENTS-

Lakemont was designed as the finest residence park in Oakland. The streets are 60 feet wide, are made of a superior quality of oiled macadam, and follow the natural contour of the land. All the wires have been placed underground. The improvements cost close to \$200,000.

HOW TO GET TO LAKEMONT

From San Francisco take Key Route boat, then Lakeshore Key Route train to Grand and Lake Park avenues, within two blocks of the tract. From Oakland take E car and get off at Excelsior Avenue. Or motor out Grand Avenue to Lakeshore Avenue, or from East Oakland come by way of Lakeshore Boulevard to the tract office at Excelsion and Lakeshore Avenues.

Then ask the salesmen with the blue ribbon. Or phone Lakeside 243 and we will send an automobile for you.

the dressing rooms to the start at the lake.
Following the race, the men will return from the finish to the "T" where not showers will await them. These facilities bid fair to excell anything of like nature of recent years and everything possible has been looked after that would nid the runners of he Eighth Annual TRIBUNE Meritt Marathon in any respect.

P. A. A. WANTS BLANKS.
Report reached us yesterday after-oon from Pacific Association head uarters to the effect that there has seen such a heavy run on entry danks during the past two days that he supply is exhausted. This is he first time such a thing has hapened, for as a rule the athictes just lip the entry blank from the paper and send it in, sometimes correctly filed out and then again, not completely filled out. Those who get heir blanks at P. A. headquarters re certain to be registered when hey send in their blanks, and this will do away with much work in the noments of checking over the entries. Sam Goodman of the Pacific Association is greatly enthused over the prospects for the Eighth Annual.

RUSSEL W. FRISBIE and his eleven-pointer that used to live in the hills back of Livermore. It is the finest head ever brought into Oakland from any part of Alameda county.

Sounds like a fairy tale or the story of a hunter who found something else in the hills besides a deer, but the evidence is herewith presented b) with the picture of the mighty hunter. The hunter is Russi W. Frisbie, local of automobile man, and the deer's name is Venison. A seven-pointer was the record for the Livermore hills before Frisble leveled on the big one.

The local nimrod went a-hunting; three pointer that he shot in the on the opening day of the season. Hanna Mountains. Lake Co. ren-Point Stag Is Killed Near Livermore Local Fans Pulling For Seattle

Charley Graham, manager of the San Francisco Seals, has not given up hope of his club winning the 1920 pennant. "If they can count Seattle in the running, why can't they count my club in it?" That is what Charles had to say yesterday. The Seals were counted out of the running some weeks ago by the "wise" ones, and right now it does look like a six-game lead is pretty hard to overcome in the seven remaining weeks of play. Still bigger leads than that have been overcome right in the Coast League and the major leagues, and in less time than seven weeks. The Portland club hasn't

been going along any too nicely, and maybe Graham figures that the present series with the Sacramento Coyotes, and the one next week with the Beavers will give his club a grand chance to gain

wants to see the Oaks finish in the basement, and even though they are, hoped that the Seattle club would make a cleanup on the locals in their present series. The Oaks are out of the pennant fight, while it looks like Clyde Wares' Seattle club has a fighting chance of copping the pennant. Clyde is a big favorite in the local basebali circles. Clyde and Cutshaw were the keystone bag guardians for the Oaks in 1910, and not since that time have the Oaks had as infield combination as good. Wares was with the Oaks for a part of last season, and although he was far from being the valuable player he was in 1910, he was out there hustling all the time.

Ball Players, Big and Little, Will Be Out in Force for Practice Games This Afternoon.

By MAURY PESSANO
From now until The OAKLAND TRIBUNE Midwinter League ppens its season most of the managers of the Class-A division of the eague will experiment with players. Already several of the manigers have signed players who will be ready to take the field in opening game of the league October 21. Most of these hoys are playing down the valley, and in several of the other leagues, but just as soon as the local managers are ready for them they will pack their grips and leave for these parts. Those clubs in the Class-A league that are playing before the fans now will make several changes, while the Crystal Laundry club and the Adameda Beths will start right away and line up their club for the winter.

Every club in the league has ben notified that the anti-Mays agitation must cease. Johnson said according to this report.

MORAN BEATS WHITE.

EAST CHICAGO: Ind. Aug. 28.—Put Moran gave Charley White a drubbing here this afternoon and won the decision at the end of the scheduled ten rounds. White was not in the best condition and it reacted in favor of Moran, who started milling from the first goog.

General Mays, the Yank hurler, who pitched to this report the covores got off of Silm Love, who had nothing to worry about with his teammates giving him an early lead. Silm also connected for three hits in the first game as did Jimmy O'Connell. In the second game, the Seals outthe Pinches Ken Penner worked at his best. The Covores, but when it came to the long end of a 4 to 1 score, getting all their runs in the first two innings on five of their eight hits. The Seals got their runs in the fourth Inning when they bunched four hits. The first infing was the only one that they didn't get a hit off Penner. Davies, a young southpaw from Santa Barbara, relieved Scott after the seventh and didn't look any too promising.

NEWARK VS. TRACTORS

William Wagner, monoger of the C. L. Best Tractors, will bring the Wedgewood club from Newark to San Leandro for a game with the Tractors. Although the Tractors beat the Halton-Didders last Sunday, Managed Wagner thinks his boys will have to step fast to tack a defeat on the Wedgewoods. The bdys from Newark have been stepping fast lately, beating some of the best clubs traveling out of Oakland. "Shine" Silva is doing the twirling for them. He has been doing the pitching for that club for several years, and has been offered several jobs with clubs down the valley. He has a lot of stuff on the pill for a little fellow, and is going to cause the Tractors a lot of trouble this afternoon. The Tractors will use Heine Lay, who showed enough against the Haltons to warrant another trial with faster company. When right Heine is one of the hardest boys in the bushes to beat, something he proved last Sunday at Lincoln park.

The Newark byys expect to bring a big delegation of fans to San Leandro, and William Wagner is ready for them. The game will be called by Jerry Lawlor at 2:30.

The Oakland Moose will be at home today, playing the 55th Infantry, who come from San Francisco with a good SACRAMENTO o 1 4 0 record. Managor Shorty Hale is get0 3 4 0 ting his boys ready for the Winter

HAVE DARK HAIR

Nobody Can Tell When You Darken Gray. Faded Hair With Sage Tea

Grandmother kept her hair beautifully darkened, giossy and attractive with a brew of Sage Tea and Sulphur. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Weyth's Sage and Sulphur Compound," you will get a large bottle of this oldtime recipe, improved by the addition of other ingredients, all ready to use, at very little cost. This simple mixture can be depended upon to restore natural color and beauty to

the hair.

A well known downtown druggist says everybody uses Weyth's Sage and Sulphur Compound now because it dargens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, toe. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and beautiful.—Adver-

Coats Dresses

THE COATS are cut along wrap, drape and loose lines. Collars of fur in Beaver, Hudson Seal, Opossum, Lynx and Mole are particularly stylish. Other collars of self material are offered in draped and cape effects. The fabrics include Bolivia, Corduval, Velour de Laine, Veldyne, Lusterole and Tinseltone. Prices \$69.50, \$79.50, \$89.50 to \$395.00.

(Other models from \$39.50 upward)

THE SUITS favor the straight lines, cleverly tailored. Fancy models, embroidered and fur trimmed are also most appropriate. Ylama Cloth, Tricotine, Duvet de Laine and Kitten's Ear Broadcloth are all demanded. Prices \$69.50, \$79.50, \$89.50 to \$225. (Other models at \$39.50 upward)

THE DRESSES portray innovation lines, ranging from the fancy tailored to the elaborate embroidery and beading. Tricotine is much used in the wool fabrics. Satin in black, brown and navy is also a favorite. Prices \$49.50, \$59.50, \$69.50 to \$195.00.

The Keith collection at the Oakland Art Gallery is one of the best drawing cards the Art Association has staged for moons. Lovers of the earnest Scotsman who worshipped nature as expressed in her California moods are frequent visitors, and those moderns who are out of sympathy with the technique of painter, as indeed they are with any manier that departs from Cezannism, do concede the message that the California painter-poet com-municates to his audience—a message of peace, a reaction from the spirit that moved the painter to record his own emotions.

Winkler's Etchings Of Chinatown Hold Interest

In the corridors of the Print Rooms-the arched corridor that is splotched with shadow from the suncourt—is a collection of etchings by J. W. Winkler, the earnest young artist who has been busy drawing down prizes in the East, the last honor having been achieved at the Chicago Institute, when one of his things was added to the permanent

The current show at the Prin Rooms is mostly concerned with Chinatown-the concentrated Orient in the heart of San Francisco, where its color and line have enthralled many a man before young Winkler. He is particularly given to depict-ing the shops of the quarter-keen-er a bit upon vegetable shops than upon others, and for the obvious reason—color. "But," you say. "these etchings are black and white. Where is the color?" There is one of the fundamental require-ments of etchings—the color qualities of the subject must be suggested original color, life and just in the light and dark of the plate. a manner nature approves. And the keener the painter's con-

ception of color, the subtler will be his methods of putting over his story, with line, his medium. Young Winkler has been a promisng product of the San Francisco Art School for two years. When his first work was presented to us, it had the effect of a battery shock— a mere youngster to have acquired so simple a method to tell his story. His economy of means was amazing in a student. But when do men cease to be students? Happily some

men never.

The etcher—he avows he wants never to be anything but an etcher.

Joving his needle and plate with a lover's passion—has a nice understanding of the bland Celestials who preside over the picturesque shops that belowel the quarter—sleek, rotund of country interesting the country in the country

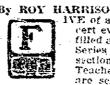

tund of equator, introspective.

Mr. Winkler gets the Oriental at: mosphere into most of his concepts, the smell of chop sucy and other things that go to compose the arreating arema of the quarter. But in his other subjects he is not always so happy. Perhaps he is more at home with his Orientalisms.

The Telegraph Hill things are, some of them, exceedingly interesting, particularly the "Piers from Telegraph Hill," a difficult bit of composition, requiring a nice discrimination in the elimination of detail. It will be interesting to see what the young etcher will extract from

You cannot expect to forge ahead in life with plenty of energy and power if your llow of energy and power if your red blood—rich in iron—to keep the human making working with. Without iron your corpuscles die by millions, the strength goes from your body and you drop among the weakings and failures.

"But when such men and women supply the right kind of iron to their blood, a most surprising change often takes place," says Dr. John J. Van Horne, formerly Medical Inspector and Clinical Physician on the Board of Health of New York City. "The weak colorless blood which had been moving sluggishly in the veins becomes rich and red and courses through the body, building healthy tissue, giving renewed force and increased strength. portant contests for state officers. From surface indications no large sums are being expended in the senatorial struggle. Only one of the Republican candidates is in a position to open a large sack, but to date there are no indications of a loosening up on his part. In the contest for the Republican nomination between former Lacta tenant Governor Wallace of Los Angeles, Samdictions owing to the numerous uncertain factors that this year must enter into the calculations. Geography and prohibition are two of the most ! important of these factors. In the matter of of California's senators are residents of San Francisco, and in the pending contest three of the aspirants are from the San Francisco bay district that it is entitled to at least one of the two representatives from this state in the upper house of Congress. (Hancing at the registration figures as compiled by the secretary of state it is shown that 202,191 Republicans are entitled to vote at Tuesday's primary in Los Angeles county alone (from which county Wallace hails), while the city and county of San Francisco has enrolled but 132,040 followers of the G. O. P., or 70,151 less than its southern; rival. Alameda county has the next largest Republican registra ion, 91,486. which makes that county a most important facfor in the senatorial contest. From all reports. Southern California is in earnest in its determi nation to elect a United States Senator in close touch with the many peculiar problems that see tion has to solve. On the prohibition issue Shortridge represents the "wets" and Wallace the "drys," while Kent is reported to be more wet than dry. The official endorsement of the "work" it is been given to both Phelan and Shortridge. In I fresh from his recent White House conference the this connection the Wallace supporters argue if Shortridge should be nominated, that at the general election the wet vote will go to Phelan, i who stood in Congress with the wet interests, and | tion of a "Progressive" But whatever may acwith this fact generally admitted contend that Wallace will be the strongest candidate that the Republicans could name. Recalling the state vote | and speculation, quite to the enlivement of the of two years ago on prohibition the attitude of Phelan and Shortridge would appear to be in line with California sentiment, although the legislature voted "dry" and Stephens was elected gov ernor on a dry platform regardless of the state wide vote in 1918. The eighteenth suncodment has been adopted since California expressed itself both ways on the question, and this, the "drys" claim, has strengthened their position, holding

that the country desires "no backward step" Factors in Senatorial Contest

There appears to be some doubt as to the post contest. To date Senator Johnson has given no public indication of his position. The best information discloses that the Johnson forces are badly split in their support of senatorial candidates. Certain San Francisco Johnson leaders are for Smorthage, waste beares are bringer Kenne 1 or mstance. Al McCabe is for Shortridge and Dan-Ryan for Kent, while in the south former Senator Frank P. Flint, who headed the Johnson Califor supporters of Wallace. Governor Stephens is for Wallace, although apparently quiscent. Short with Kent apparently on the long and All three Northern California candidates declare that War lace is the man they must defeat. Rent is rather lukewarm in his support of the national Republic for Harding and subscribed to the Republican national platform. On the Wilson League of Nations Shortridge is opposed to the instrument Discussing Abolition of Patronage in toto. Wallace is inclined to favor some kind of a league, but accepts the Cileago platform declaration, and Kent is quoted as opposed to article X. These combined factors are pazzling to the most expert prognosticators, although be wiser Wednesday morning.

placed to secure committal of Republican Presidentral Candidate Harding upon all issues vitally related to this State's weltare, upon the occasion of the California visit to Marion, September 14. Already promise has been received that Senator Harding eagerly awaits the opportunity afforded him to place himself on tecord regarding Cali formal's legislative needs, he taking the broad given burner, the is capital to the same , pre election committal from the foremost candidates. In striking contrast to the announcement of Vice Presidential Candidate Roosevelt of the Democratic party, in whose esteem the "tariff is interest principally because there are no other in 1 a dead issue in this campaign." Senator Harding holds that scarrely a State in the Union is more vitally interested in the preservation of the protective system than California. The vast wood and timber interests of the State, the live stock and dairy interests, the fruit and all agricultural interests of every kind, are directly affeeted by tariff schedules, their prosperity bound up in the maintenance of liberal protection againsi Oriental cheap labor production. Senator Harding's definite declaration commutting him to this policy for the period of his presidential incumbency will greafly advantage California at this time, as it will lend assurance of her continued growth and

Joking About a Serious Matter

A fact which has caused considerable comment since the departure of the Democratic Vice-Presidential candidate. Franklin D. Roosevelt, is his failure to mention, in his entire discourse, the name of President Wilson, even once. Though he made a brave show of partisan zeal, and summoned his utmost rhetorical resource in ridicule of Remblican pretensions, he passed up his big chief at Washington as a withered leaf. Coming failure of the caudidate seems inexplicable except upon the ground that he places homself apart from the war horses of the old regime, in his new posicount for the passing of Wilson in Roosevelt's rhetoric the fact has afforded food for thought campaign. But for this glaring unconventionality, and the decidedly had break which Roosevelt made in stating that "the tariff is not an issue in this campaign," he might have come and gone. and, as Colonel Crocker, chairman of the Republican State Central Committee, said of it, and left | no more evidence of his advent than remains after withdrawing one's finger from the ocean. Roosevelt's dismissal of the tariff matter in the airy manner employed by him left his Democratic cohorts gasping, while his Republican friends have been jubilant. Over in Nevada Chairman tion of the Johnson organization in the senatorial. Humphreys of the Republican State Central Comas to all wool growers of the Slope, the tariff is the paramount issue. "The Nevada wool growing interests" he says "comprise the second industry engagen in our money and all busines die einfrom the industry, faces absolute rain as the result of the Democratic tariff. Ever since tons of cheap Australian wool were dumped into Boston nia delegation at Chicago, is one of the strong, by the English interests at the close of the war, and sold for any price offered, every American wool grower has faced ruin. Congeniand he thought any impairment of the strictest personal relationship between himself and his department chiefs, which would tend to create regardful consideration of a civil service commission, as a means of retaining security in fat office, would prove detrimental. He desired direct and undivided control of his subordinates and asked undivided allegiance of them toward him. A somewhat contrary view was entertained by some others. Auditor Boyle thought it would be well as this latter body is to be enlarged to seven enough to place all departmental chiefs and, perhaps, many other subordinates, under civil service control, no macter wagther now employed or after wards qualified. He saw no reason why application of civil service conditions to employees should cause them to relax their fidelity to their chiefs. or to insure in them reliance upon a civil service commission as their chief benefactor and agency to be first served.

City Attorneys Are Disturbed

There has been going on for the last two months a systematic exchange of letters and conversations among all the city attorneys in Northern Cali forma. The object has been to sound out the individual views which have resulted from the experiences of the city attorneys with the commission. I am informed by the attorney who took a leading part in conducting this symposium that the replies almost unanimously express dissatisfaction with the attitude of the commission toward the public, as distinguished from corporation public utilities. A general conference of the city attorneys is planned for the near future, when an open and frank discussion will be held on what might and ought to be done. One of the most frequent complaints is that of dilatoriness in responding to requests in the name of the publie. One of the cases cited in support of this complaint is the request of the city of Auburn that the commission make an evaluation of the water utility serving that city and owned at present by the Pacific Gas and Electric Company. Although this plea was filed over a year ago, no statement has yet issued from the commission as to what it purposes to do. One attorney, who was an office holder in Governor Johnson's first administration and who worked hard as an adviser of the Governor in drafting the reform legislation of the time, which included the new public utilities law, frankly expressed the opinion that the commission had become the "bulwark of the corporation utilities, and had ceased to protect the interest of the people, the task for which it was created." Another observation which has been reduced to writing, and which I have inspected, is that "the remarkable friendliness of the commission for a certain public utility has been evidenced by the exchange of employees by the commission and this utility." One man who was a district manager for Senator Hiram Johnson in and South, and Central American ports; to all mittee takes the declaration seriously. To him, his last campaign for Governor advances the argument that the members of the railroad commission should be elected because their acts affect directly, in many ways, the personal welfare of in the State. Today every concern or individual the people. Telephone, gas and light, water and tangehan street car rates all strike directly at the family budget and the individual pocket book. and therefore the rate-fixing commission should be held directly accountable to the people. This is not an argument that would have overwhelming weight if the membership of the commission was selected for acknowledged ability alone, but the leaders in the present movement of creating sentiment for making the members elective claim that in recent years political rewards have been translated into appointments to the commission. How far the movement will progress is impossible to tell at this time, but that the majority of the city attorneys in northern and central Califorms believe that something should be done is a fact. They are very serious about it.

New Law Pleases Shipping Men

Shipping and ship constructing interests around San Francisco Bay are considerably heartened by fuller knowledge of the Jones merchant marine act. In its provisions it goes further and embraces more consequential regunorth is split between the candidates from that he feared such move might give to departmental latory authorization in the furtherance of American commerce than any measure relating to shipsome congetion toward their superiors, whose in I ping which has passed within the last century. Pacific Coast shipping is greatly ad-

here enjoyed. British interests have been quick, to protest this provision, with some show of intent to retaliate. Discrimination against American shipping in foreign ports or against cargo offered by Americans or for American destination to foreign ships is drustically penalized, and every reasonable advantage/extended to encourage construction, and operation of American ships to every port approved by the Shipping Board. And members, two from each coast and one each from the Gulf, the lake region and the interior, and to be granted formidable authority, the scope of American activities in foreign trade and transportation is expected to become far greater than heretofore. New markets and hitherto untried ports may be placed on regular routes of communication responding to the wide divergence of American productivity and demand. Marine insurance is to be relieved of some of its long-borne pains and penalties, to American advantage. Herein, again. British retaliation is whispered. In the provisions of the act intended to place American merchant ships on an equal plane of advantage with the ships of other nations, American coastwise laws have been extended to include Alaska, Hawaii and the Philippines, another cause for a vigorous kick from England. By providing for an annual loan fund of \$25,000.000 wherefrom may be borrowed two-thirds the cost of construction of American-built ships, subject to certain limitations, vast encouragement to American merchant marine extension on this coast is believed to be furnished.

Japan in the Pacific

The need of greater governmental consideration for our foreign and coastwise shipping is increasingly urged in shipping circles and shipbuilding offices on San Francisco Bay by reason of the increase of Japanese ships appearing here from year to year. Of late this matter is urged rather more strenuously than ever before because of Japan's extended Pacific possessions, and also. by reason of her extension of subsidized service to all Western Hemisphere ports. With the new prospect and new conditions now recognized to exist in the world of navigation and trade, as in politics, there is grave anxiety here lest American shipping interests be denied the paramount consideration which trade and national safety demand. With the passage of the Jones measure the Pacific merchant marine is more than ever discussed, and frequent allusion to Japanese alertness and sagacity in providing navigation subsidies is made. It is well to remember what those policy during the seventy years since Perry opened the Hermit Kingdom to the modern world. With that country navigation subsidy is fixed policy, its annual budget carrying specific amounts, graded to the service rewarded, and granted as new enterprise falls within the condition stipulated. Japan's basic bonus rate is 50 sen per 1000 nautical miles of ship travel. All such bonus, under the prevailing legislation of 1910, must go to ships of Japanese construction. of 100 per cent Japanese ownership, of required age and condition, of steel only, and capable of making not less than twelve knots. Under certain exceptional conditions variation from these requirements are made, but only at a reduction of subsidy. By this far-flung scheme of ship promotion Japan has succeeded in establishing lines, usually profitable to their owners, to all parts of the world. She maintains Pacific lines to North island ports of the Pacific and Indian oceans, as well as to most African and European countries. Not only this but her great steel ships are among the best and most competently navigated vessels in world commerce and trade. Of course, the cost of this accomplishment to the Imperial government has been great, but the returns have amply justified the expenditure.

The Spirit of the Times

Arthur Fisk, former postmaster in San Francieco, was in the city this week on a visit from his ranch in the Imperial Valley. He looks much thinner than usual and wore a college student's abridged version of a cowboy hat. But Arthur explains that it is only the excessive heat that caused him to lose weight and says he never felt better in his life. He shows all his old time energy and congenial disposition. Canta's revolution was only hot air and there was no anxiety in the Imperial Valley over the apparent menace of a disturbing war, according to his report. Arthur Fisk is the first person I have heard comment on a condition which has become plain to many men who formerly were active in club life. "This place seems much different," he said in the lobby of a famous hotel. "The people I know seem different. I have passed twenty of my old-time friends today and they did not recognize me. It pained me. I don't think I have changed that much, because they did not appear to greet other friends as frequently or as cordially as of old. Has the spirit of gentality passed? Are we getting sour and "hard-hoiled" and discontented? I have not been here for over two years, you know. | ship. and I think I sense a sad difference." No, Fisk

ality and friendship thrived in the days of wellstocked buffets better than it does in the present aridity. People are more secretive than they once were, more self-centered. There is a wellknown railroad man here who for twenty-five years followed a rule to make one new friend every day; he held friendship so highly that he thought this was the best thing he could do with. his hours off duty. But the rule has been suspended many months now.

Court Scandal Not Closed Episode Doon intowest in the must precedentions, not

withstanding the recent suspension of activities by Attorney General Webb, holds with the Bar Association of this city, as with the public generally. Profound respect for Judge Jeremiah F. Sullivan, the venerable president of the body, coupled with his conscientious persistence in endeavoring to clean out "a system which degrades the administration of justice in this city," as he defines it, holds public interest and faith that, though delayed, in the end San Francisco may be able to declare her courts emancipated from the grip of evilly disposed officials and henchmen. long their disgrace. On Tuesday evening next the committee having charge of procedure looking to the dismissal of Police Judges Oppenheim and Suffivan will hold a meeting, at which time it is expected a plan will have been formulated upon which successful action may proceed. The problem involved lies in the matter of securing expulsion from office, not in securing disbarment. The weight of authority is to the effect that disbarment does not work vacation of office held by the accused. Under present legal provisions it would be entirely competent for the Board of Supervisors, or the mayor, to institute investigation of the grand jury proceedure whereby Judge Oppenheim was indicted but without return thereof, and whereby Police Judge Sullivan was summarily absolved of the grand jury indictment against him. There is ample justification in the revelations of the recent grand jury probe for the filing of charges of malfeasance against these officials, which act would result in dismissal or suspension, depending upon securing fourteen votes in that behalf among the supervisors. In the absence of official procedure looking toward the clearing up of the situation the Bar Association may be relied upon to formulate and prosecute appropriate and efficient remedies to accomplish the desired purification of the police courts of this city. This purpose was firmly announced in the report of its special committee made March 20, last, passed, in the following language: "We Orientals have done through a liberal shipping do not consider it improper at this time to state very clearly that at the right time, when our activities cannot be distorted into an interference with the present investigation being conducted by official bodies, we shall ourselves continue with an examination of the charges and the taking of such steps as developments may dictate."

The Real Issue

Commenting upon the outcome of the fierce school feud which has raged before the Board of Education and in the press for some time, between parties variously interested in the schools. School Superintendent Roncovieri insisted to me the other day that his motives in filing the complaint against Principal Addicott had not been made clear before the community, and that if they had been the talk about politics being involved in the controversy would never have arisen. He insisted that he did only that which his official obligation demanded of him, and that he had no alternative in the premises. He insisted that no feeling of animosity on his part was had against Addicatt, but that, on the contrary, he had only recently taken occasion to commend the principal of Polytechnic High for certain approved conduct. The gist of the whole controversy centered in the low rating of the school before the university authorities, that having gradually decended to 2.62—the lowest high school rating in the Stafe -under Addicott's management. The chagrin of this state of affairs seems to have kept the principal himself in a hostile attitude of mind, an atfitude which found expression in his unwarranted rate card records and which was reflected in the suspension system employed in his school. By the wholesale dismissal of seventy-two pupils for failing in their examinations, presumptively for the purpose of making a showing of higher class average than was otherwise possible, as was charged, the Addicott management lost all claim to public regard or student respect. By publicly branding, in permanent records of the school, certain pupils as "liar." "forger," "thief" or "gambler," as was done by writing such charge in ink across the backs of pupil's record cards. Addicott adopted, it is held, a system subversive of public morals if not potentially productive of criminality in the pupils thus unwarrantably handicapped. The finding of the school board before which Roncovieri's charges were heard removes Addicatt from all connection with San Francisco schools, and may result in establishment of order and discipline in Polytechnic High, and in raising its standard of scholar-
